

Building a New Perspective

Do you have a significant vision concern or have a close friend or family member with vision loss? Knowing other people who are in your situation can be helpful in understanding how to manage your life in new ways. Vision Forward invites you to join us for supportive groups to learn how to make life easier and to share feelings surrounding the challenges related to changed vision.

Vision Forward offers a variety of supportive groups. Some of our groups are specifically tailored to parents who are visually impaired, as well as parents with visually impaired children. Please contact Erica Weise for more detailed information.

In addition to Vision Forward, there may be other supportive groups in your community. Below, is a listing of these groups, as well as the contact information.
