

Acesight VR

Overview

Acesight VR combines state of the art technology with easy operation for the ultimate wearable! With a 48 megapixel camera and a Full HD screen, the Acesight VR has fantastic image quality and no image lag. This means a smooth and crisp image even when moving! Combine this with a weight of less than a pound and a 65 degree field of view, and you will soon see that the Acesight VR is top of its class. Read, watch television, write, go to a play or concert...the possibilities are limitless. Enjoy your sight again with the Acesight VR.
