

Seeing AI App

Available on iPhone and iPad only

Cost: Free

Most functionality with iPhone 12 due to LIDAR feature

Fully accessible with VoiceOver

[Link to our demo video](#)

Features

Short Text: Speaks text as soon as it appears in front of the camera

Documents: Provides audio guidance to capture a printed page, and recognizes the text, along with its original formatting. Have text read aloud with VoiceOver or with the built in TTS voice. Share recognized document via SMS, email etc.

Products: Gives audio beeps to help locate barcodes and then scans them to identify products

Person: Recognizes friends and describes people around you, including their emotions. Save the names of your friends!

Scene: An experimental feature to describe the physical scene around you, letting you know what physical objects are nearby

World: World: The new World channel, available on devices with a LiDAR scanner running iOS 14, enables you to explore an unfamiliar space in 3D, using spatial audio. When wearing headphones, you will hear objects around you announced from their location in the room. You can also find a particular object by placing an audio beacon on it

Currency: Identify currency bills when paying with cash

Light: Generate an audible tone corresponding to the brightness in your surroundings

Color: Describes the perceived color

Handwriting: Reads handwritten text

Accessories

- 1) Justand V2 <https://ipaddocumentcamera.com/pages/justand-v2>. This iPad/iPhone stand is a great accompaniment to the Seeing AI App, allowing you to easily full 8.5x11 pages of text
