

Louie

Available on: Android
Current Price: Free
Needed: Android 7 or later

What is Louie?

Louie is an app for Android that makes many functions of your phone accessible with voice control functionality! Although phones have built-in speech recognition features, these are often limited in what they allow you to do. With Louie you can control all features of certain apps, including:

- 1) Contacts
- 2) Phone
- 3) Whatsapp
- 4) YouTube
- 5) Uber

More apps will be added over time, making Louie even better. Use your voice to control all features of these app, with useful voice feedback prompting you with the options you have at any time. You can customize your experience, controlling the speed of the voice feedback, the verbosity, how Louie is activated and more!

From the Developer

Imagine being able to fully control popular Apps and phone functionality with just voice commands!

By just giving voice commands to Louie, you can:

- Book a Cab/Taxi
- Enjoy your favorite videos
- Send Text or Audio Messages, Share Audio & Video, Make Audio & Video Calls
- Fully Manage your Contacts & Make Phone Calls
- Many more Apps are on the way

Louie is an accessibility App and can be used by all voice-lovers including but not limited to visually impaired, blind, motor-disabled, elderly, people with limited manual dexterity and all hands-free lovers. Louie needs accessibility permissions to operate.

None of the leading Voice Assistants or Personal Assistants can do what Louie can:
*Voice Assistants tend to be superficial & will allow you to do only 2-3 things within an App. Louie in comparison will fully voice control an App - each and every feature within the App.

*Leading Voice Assistants or Personal Assistants have a nasty habit of going silent every now and then. Louie in comparison will do a two-way continuous interaction – just like a human interaction

Louie has been built by a visually impaired person - Prमित. Imagine if Louie works for a visually impaired, it will work for everybody else.

Point of Contact

We would really want to hear from you. Your ideas, suggestions and feedback will help us make Louie even better. Kindly feel free to reach out directly to the Louie Founder at Pramit@louievoice.com
